

# Ignition Datatypes Supported via MQTT

## Tag DataTypes

Datatype	Supported via MQTT
Byte	v4.0.1 through current release
Short	v4.0.1 through current release
Integer	v4.0.1 through current release
Long	v4.0.1 through current release
Float	v4.0.1 through current release
Double	v4.0.1 through current release
Boolean	v4.0.1 through current release
String	v4.0.1 through current release
DateTime	v4.0.1 through current release
Text	v4.0.1 through current release Deprecated by Ignition in 4.1.8
Dataset	v4.0.1 through current release
Byte Array	v4.0.6 through current release
Short Array	v4.0.6 through current release
Integer Array	v4.0.6 through current release
Long Array	v4.0.6 through current release
Float Array	v4.0.6 through current release
Double Array	v4.0.6 through current release
Boolean Array	v4.0.6 through current release
String Array	v4.0.13 through current release
DateTime Array	v4.0.13 through current release
Binary Array	v4.0.21 through current release
Document	v4.0.7 through current release

## Tag Property DataTypes

Datatype	Supported via MQTT
Number	v4.0.1 through current release
String	v4.0.1 through current release
Boolean	v4.0.1 through current release
Array	v4.0.22 through current release
Dataset	v4.0.22 through current release
Document	v4.0.22 through current release
