

How do I know if my MQTT modules are compatible with my version of Ignition

Check out the [Cirrus Link Modules Compatibility](#) matrix.

Unable to Resolve?

If the troubleshooting tips did not help you resolve your issues, please open a ticket with [Support](#) making sure to include the MQTT Transmission, MQTT Engine and MQTT Distributor logs as appropriate.

From the Ignition Logs view, select the Download icon to download a copy of the system-name.idb file to your local file system. You will need to compress (zip, 7z or rar) this file before sending to Support.
