AWS Tools

The AWS Tools from Cirrus Link are fundamental blocks in the architecture shown below. Specifically, the tools covered here are IoT Bridge for SiteWise and SiteWise Engine.

IoT Bridge for SiteWise

In a nutshell IoT Bridge for SiteWise connects to an MQTT Server on one side and consumes Sparkplug messages to create and update AWS SiteWise models and assets automatically without the need for any code. More information on its basic functions can be found here. If you would like to try it out the quickstart manual is here.
