

IBSNOW: Logging Errors

- Failed to load the private key based on <PRIVATE KEY>
- 400 Bad Request

Failed to load the private key based on <PRIVATE KEY>

This error generated by the `com.cirruslink.ingest.snowflake.StreamingIngest` logger indicates that the private/public key pair for snowflake connection is encrypted.

The key pair must be unencrypted

You will also see a stack trace similar to the one below:

```

400 Bad Request

This 400 Bad Request is returned from the Snowflake Streaming endpoint when using the URL configured in your Snowflake Streaming Profile configuration.

This can be caused by a number of configuration errors:

1. The URL is incorrect or malformed

2. The user and role are mismatched or incorrect

```
