

Snowflake Tools

! New IoT Bridge for Snowflake Available

This document covers v2.0.0 and older versions of IoT Bridge for Snowflake. It now ships as part of Chariot. To see the latest IoT Bridge for Snowflake documentation, go to [IoT Bridge for Snowflake in Chariot](#).

The Snowflake Tools from Cirrus Link are fundamental blocks in the architecture shown below. Specifically, the tool covered is the IoT Bridge for Snowflake.

IoT Bridge for Snowflake

In a nutshell, IoT Bridge for Snowflake connects to an MQTT Server on one side and consumes Sparkplug messages to create and update Snowflake models and assets automatically without the need for any code.

More information on its basic functionality can be found [here](#).

If you would like to try it out, see the [AWS Quickstart](#) or [Azure Quickstart](#) to get everything set up.
