

# Azure Marketplace offering fails to deploy with subscription error

## New IoT Bridge for Snowflake Available

This document covers v2.0.0 and older versions of IoT Bridge for Snowflake. It now ships as part of Chariot. To see the latest IoT Bridge for Snowflake documentation, go to [IoT Bridge for Snowflake in Chariot](#).

The error below indicates that the subscription you are trying to deploy into is a Microsoft CSP (Cloud Solution Provider) created subscription.

```

If you want to deploy into this Azure subscription, the following steps must be taken so that Cirrus Link can white list the CSP Tenant ID:

1. Record the subscription ID for the "CSP" subscription that you want to deploy the offering into.
2. Give this subscription ID to the CSP to give to Microsoft Support.
  - a. The CSP needs to request their CSP Tenant ID for the subscription ID provided in Step #2 above from Microsoft Support.
3. Provide Cirrus Link the Tenant ID to be added to the CSP whitelist on the offering.
  - a. It usually takes 24 - 48 hours for this submission to complete.
