

# IBSNOW: How to find your Azure Marketplace Billing ID

## New IoT Bridge for Snowflake Available

This document covers v2.0.0 and older versions of IoT Bridge for Snowflake. It now ships as part of Chariot. To see the latest IoT Bridge for Snowflake documentation, go to [IoT Bridge for Snowflake in Chariot](#).

There are several ways that you can locate your Azure Marketplace Billing ID

- Scan your account using the private offer precheck functionality described in the Microsoft documents here <https://docs.microsoft.com/en-us/marketplace/private-offers-pre-check>
  - Export the report with the billing account ID included.
  - In the report there is a column called "CanDeployPrivateOffers" if this does not say TRUE for the billing ID then this is not the correct number, follow the Microsoft instructions to resolve this issue.
- In the Azure portal, the customer can navigate to **Cost Management + Billing** > **Properties** > **ID** to find their billing account ID.
  - A user in the customer organization should have access to the billing account to see the ID in the Azure Portal.
