Architecture Examples

- Getting Started: Single Ignition Architecture
  - A simple architecture showing how MQTT Transmission and MQTT Engine interact via MQTT Distributor in a single Ignition instance
- Getting Started: Two Ignition Architecture
  - Create a complete basic MQTT system using MQTT to publish tag data from one Ignition system to another
- Advanced: MQTT Modules in Redundant Ignition Environment
  - Adding redundancy to MQTT enabled Ignition systems on the edge and at the central gateway.
- MQTT IIoT Recipe
  - Recipe tutorial for creating MQTT architectures
