

Chariot MQTT Server Installation

The Chariot® MQTT Server can be installed on multiple different platforms. The following page contains links to download the Chariot MQTT Server:

- [Chariot® Downloads](#)

Below are documents describing the processes for each supported platform.

- [Linux Installation](#)
- [Windows Installation](#)
- [AWS Marketplace Installation](#)
- [Azure Marketplace Installation](#)

Follow this tutorial to [Upgrade Chariot to a New Version](#)

After installation, the Chariot Web UI can be accessed using most modern internet browsers. The supported browsers and versions are:

- Internet Explorer 11 (IE11)
- Microsoft Edge 87.x
- Firefox 84.x
- Chrome 87.x
- Safari 14.x
